Power plug beads to put in the end of cords or laces.

Assamble guide:

- Print the model as shown in the pictures in 0.16 mm or lower with supports. I printed mine in 0.12 mm with a 0.4 nozzle.
- Remove the supports and all imperfections carefully with an exacto knife.
- Cut 4 pieces of filament of aproximatedly 5 mm for each model.
- Make a knot at the end of the cord and cut any small threads that could get in the way.
- Assamble the two halves and press firmly.
